**ENABLING PEOPLE FROM ALL WALKS
OF LIFE ADAPT WELL TO CHALLENGES
BROUGHT ABOUT BY CLIMATE CHANGE
AND ENVIRONMENTAL DEGRADATION.**

Overview: ADAPT+ - providing appropriate technological and innovative solutions in the areas of renewable energy and agribusiness

ADAPT + is a green enterprise company incorporated in 2013. Our vision is to be 'A company that enables people from all walks of life adapt well to challenges brought about by climate change and environmental degradation'. Our mission is 'to provide appropriate technological and innovative solutions in the areas of energy and agriculture among small-holder households in Uganda

Our operational principles emphasize the social and environmental aspects, which stem from the genesis of the company. We focus on the underserved and most energy-insecure sections of society and provides appropriate energy solutions that can meet their needs on a sustainable basis.

ADAPT+ recognizes the synergy between recycling-based energy solutions like briquettes and ethanol and agriculture; and, develops solutions that do not only maintain but also enhance soil fertility and production. A full program in this line, code-named *Community Food and Energy Balance* has been developed and is being rolled out.

Our solutions are based on our conviction around the following areas:

Cooking should not kill - no mother should die because of cooking

Cooking is an everyday thing, so it should be affordable, instant and not wasteful

Food is a life giver, so should Cooking be.... Our solutions guarantee toxic free and enjoyable cooking

ADAPT+ Products & Services Scope

Clean Cooking Energy Solutions

- Fuel Briquettes
- Improved Energy-Saving Cook stoves (For Briquettes/Charcoal)
- Ethanol Fuel & Stoves
- Briquette-making machinery & Equipment

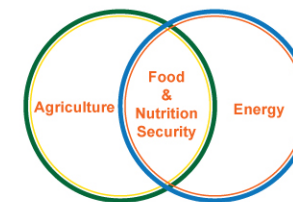

Clean Cooking Solutions Supply Chain Development

- Using a 'Community-based Depots' approach ADAPT+ develops sustainable Supply Chains aimed at ensuring sustainable access to Clean Cooking Energy Solutions by the end-user.

Training and Advisory Services

- Briquette-making
- Stove-making
- Renewable Energy & Micro-Business management

Energy-Agribusiness Nexus

- Biochar for Soil fertility maintenance and rejuvenation;
- Agro processing;
- Farmer advisory services
